

Use Your Space More Wisely

Custom Flow Racks & Workstations can get your workplace more efficient

Carton Flow

From standard boxes and totes to bumper fascias and head rests, bring it all within reach of your operators in a way that highlights ergonomics and efficiency. By creating custom load and pick heights, flow racks keep operators safe and comfortable. In addition, gravity flow racks maximize available space in a variety of working environments while simultaneously establishing consistent material flow.

Fastube is a system of resin coated steel tubing; metal, bolt-together connectors; conveyors; casters; fasteners; and various accessories that allow our customers to design, build and implement modular material handling devices and operator assists. Productivity, ergonomics, quality and safety gains, leading to increased profitability will be the end result. By utilizing the Fastube system as a tool, many companies have progressed toward their internal goals of practicing Lean Manufacturing principles, eliminating waste in their processes and creating an environment that promotes continuous process improvement.

Workstations

Fastube workstations provide employees a well-organized area featuring easy access and comfortable surroundings. Our workstations are custom designed and can be adjusted at any time to meet future organizing, sorting and ergonomic needs.
