

## S.E.A.L.S a) Cute aquatic animals

## b) System for choosing the best seal or shelter

*Remember S.E.A.L.S when choosing your next dock seals or shelters*

**Situation**

The wider the variety of trucks service, the more flexibility you must have with the trucks you serve and the design of your building

- the layout of your dock, incline or declines, size of the door opening affect your choice of seals

**Environmental Control**

Protection from elements, energy loss and safety are important issues when considering the sealing efficiency of your seals or shelters

- If you receive trailers with swing-out doors, the hinge gaps require special sealing consideration

**Access**

Limited access can lead to the load impacting the seal or shelter, causing damage and downtime.

- To ensure proper access, identify the load situations that are most often encountered at your facility

**Long Life**

The product features you choose help determine the life of your seals or shelters, and can minimize repair costs.

-have you noticed substantial wear and tear on your seals in the past?

**Support**

When you choose Frommelt seals or shelters, you're getting the world's leading brand, backed by the very best warranties, support and service in the business.

-money-back customer satisfaction guarantees
