

Racking Inspections

For Compliance with OHSA & CSA

**MATERIALS
HANDLING
LTD**

❑ You Need Your Racking Certified If:

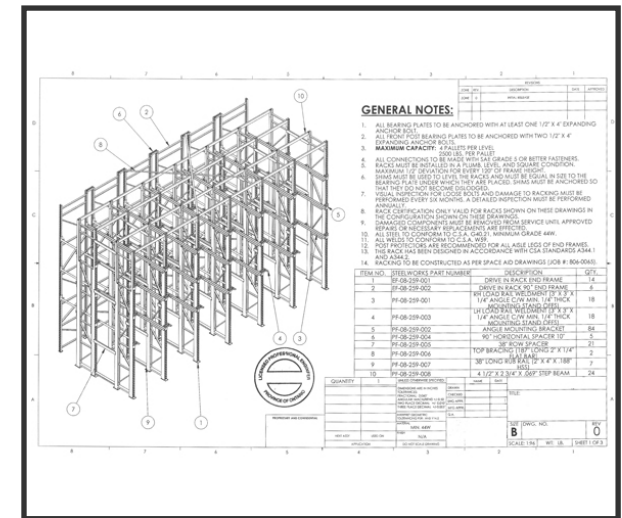

- You have purchased used Racking
- You have existing racking without a PSR documentation
- You have Modified your racking layout (including beam elevations)
- You have relocated your racking to a new area

❑ Your Rack is certified if:

1. You have had a PSR done by an engineer with stamped drawings.
 - This includes layout and capacities per beam level
2. You have a PSR Exemption letter from the manufacturer of the racking.
 - This includes a description of racking layout, beam elevations and capacity.

❑ Other Info to Know:

- Capacity Plaques should be visible on each row of racking
- Internal health and safety rack inspections should occur monthly, and expert inspections yearly.
- The Owner is responsible for complying with all rules and regulations.

Regulations:

1. Occupational Health & Safety Act (OHSA), reg 851 section 7: Pre-Start Health & Safety Reviews
2. CSA Reg. A344-17: User guide for steel storage racks.
